

A Course Completion Report

Of

Introduction to Modern AI

Submitted

To

School of Computer Science and Engineering

IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering – AI/ML)

By

Roll Number of Student: 2410030810

Name of Student: PUSHPENDRA SINGH

Batch: 2024–2028

Candidate's Declaration

I, PUSHPENDRA SINGH, do hereby declare that the report titled “Introduction to Modern AI – Course Completion Report” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering (AI/ML). All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Student Name: PUSHPENDRA SINGH

Roll No.: 2410030810

Acknowledgement

I am using this opportunity to express my gratitude to everyone who supported me throughout this course. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank Cisco Networking Academy (NetAcad) for providing me the opportunity and the structured, self-paced platform to learn and gain practical exposure in the domain of modern Artificial Intelligence, delivered free of cost as part of the “Apply AI” learning collection. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

4. Course Description

4.1 Introduction

This report presents an account of the free, self-paced course “Introduction to Modern AI”, undertaken through Cisco Networking Academy (NetAcad) as part of its “Apply AI” learning collection. The course was completed on 18 June 2026 as an independent skill-building activity alongside the Bachelor of Technology (Computer Science and Engineering – AI/ML) programme at IILM University, Greater Noida. The primary aim of the course was to build a foundational, practical understanding of modern Artificial Intelligence – how it works, what it can and cannot do – and to gain hands-on experience with widely used AI tools and chatbots.

The course combined short video lectures with interactive exercises and hands-on practice across popular AI applications, requiring no prior coding or machine-learning background. On successful completion of the course content and its assessment, a Certificate of Completion was issued by Cisco Networking Academy.

4.2 Organization Profile

Cisco Networking Academy is Cisco's global IT and digital-skills education program, offering free courses to learners worldwide through its NetAcad platform. As part of its broader “Apply AI” learning collection, Cisco Networking Academy designed the “Introduction to Modern AI” course to give learners with no prior AI background a practical, hands-on introduction to using modern AI tools in everyday and professional contexts.

4.3 Problem Statement

While Artificial Intelligence tools have become widely available, many learners understand AI only at a surface level and lack structured, hands-on practice in using AI applications effectively – particularly in areas such as computer vision, machine translation, and prompt engineering with chatbots. The problem addressed by this course was to build a practical, working understanding of how modern AI tools function and how to use them productively and responsibly.

4.4 Course Objectives

- To understand the fundamentals of modern Artificial Intelligence and how it is used in everyday applications.
- To explore computer vision through a hands-on photo-based application.
- To explore machine translation using an online translation tool.
- To learn how chatbots work and develop skills in writing effective, well-structured prompts.
- To gain hands-on practice with multiple popular AI tools and chatbots, including ChatGPT, Gemini, Claude, Meta AI, Google Translate, Hugging Chat, and NotebookLM.
- To complete an open-ended project applying prompt-engineering skills, and to clear the course assessment.

4.5 Scope of the Course

The scope of the course covers a broad, beginner-friendly introduction to modern AI – starting with core concepts of what AI is and how it works, moving into applied areas such as computer vision and machine translation, and concluding with an in-depth, practical exploration of chatbots and prompt engineering. The course was limited to a free, self-paced, browser-based learning environment provided by Cisco Networking Academy and did not involve coding, model building, or deployment on any production system.

4.6 Technologies and Tools Used

- Learning Platform: Cisco Networking Academy (NetAcad)
- AI Chatbots/Tools: ChatGPT, Gemini, Claude, Meta AI, Hugging Chat, NotebookLM
- Applied AI Areas: Computer vision (photo app), Machine translation (Google Translate)
- Core Concepts: Prompt engineering, AI capabilities and limitations, responsible AI use

4.7 Course Structure

Module	Title	Description
Module 1	Introduction to Modern AI	Fundamentals of AI, how it works, and its everyday uses; hands-on exploration of computer vision through a photo app and machine translation through an online translator.
Module 2	Chatbots and Prompt Engineering	Techniques for writing effective prompts, with guided practice across 10+ popular chatbots and AI tools.
Module 3	Open-Ended Project	A self-directed project applying prompt-engineering and AI-tool skills learned in the course.
Final	Course Assessment	Assessment to test conceptual understanding, leading to the award of the Certificate of Completion.

Note: This is a free, non-credit, self-paced course with no associated stipend or grading in the conventional academic sense.

The course was delivered through around 50 short video lectures and roughly four hours of video content, paired with interactive exercises after each concept. Learners could follow the modules sequentially or focus on areas of particular interest, such as computer vision, machine translation, or chatbots. The course concluded with hands-on practice across more than ten popular AI tools and a course assessment, culminating in the award of a Certificate of Completion by Cisco Networking Academy.

4.9 Expected Outcomes

- Ability to explain, in practical terms, how modern AI systems work and where they are useful.
- Hands-on familiarity with computer-vision and machine-translation applications.
- Practical skill in writing clear, effective prompts for AI chatbots.
- Working experience with multiple leading AI tools, including ChatGPT, Gemini, Claude, and others.
- A completed open-ended project demonstrating applied prompt-engineering skills.
- Successful completion of the course assessment and award of the Certificate of Completion.

4.10 Certificate of Completion and Communication Proof

The Certificate of Completion issued by Cisco Networking Academy, confirming successful completion of the “Introduction to Modern AI” course, is attached in Chapter 3 of this report.
